Note from the Chairperson

Dear Friends and Neighbors,

Manchester Rotary supporting our community and ECHN! We invite you not only to play golf but more importantly to help raise awareness for this dreaded disease. The funds raised from this golf tournament will go directly towards the effort to get all uninsured and under insured women the tests they need to help with the early detection of breast cancer. As we know many women today live their lives without preventive screenings, like mammograms, until it's too late and the diagnosis is devastating." Together we all can make a difference.

We look forward to your support and thank you in the interim for your support for our women in our community.

Kate Sims, President Elect

Benefits:
- Publicity in program
- Company on course.

An Early Detection Plan for breast cancer helps you to be proactive about your health by reminding you to perform routine breast self-exams, and to schedule clinical breast exams and mammograms, depending on your age and health history.

According to the National Cancer Institute:
- One in eight women will be diagnosed with breast cancer in their lifetime.
- Over 220,000 women will be diagnosed with breast cancer this year.
- When breast cancer is detected early (localized stage), the 5-year survival rate is 98%.
- Over 30% of women are diagnosed after breast cancer has spread beyond the localized stage.
